ElumTools™ 2019 (for Autodesk® Revit® 2019)

Littleton, Colorado, USA – April 10, 2018

Lighting Analysts, Inc., a global leader in illumination engineering software, is pleased to announce the availability of ElumTools 2019 for Autodesk® Revit® 2019.

With ElumTools 2019.1 (and latest releases of 2018, 2017 and 2016) ElumTools now utilizes Lighting Analysts new cloud-based subscription licensing system. Subscription licensing offers advantages such as continuous access to the latest releases and shorter time-to-value release cycle to keep users on the front edge of product development. License scalability is also enhanced with the ability to license ElumTools on an annual or monthly basis.

Subscription also introduces Multi-User cloud based license administration to replace local client-server network licensing. This makes license access as flexible as possible enabling use from any Internet connected computer.

Companion subscription releases of our annual daylight simulation software Licaso and photometric reporting tool Photometric Toolbox are also available.

Download a free 30-day Trial and explore the latest ElumTools software at www.lightinganalysts.com.
