## Lighting Analysts, Inc. Releases AGi32 Version 19

*Littleton, Colorado, USA – April 10, 2018*

Lighting Analysts, Inc., a global leader in illumination calculation and visualization software is proud to announce the release of version 19 of our industry standard calculation software, AGi32.

AGi32 version 19 is the first release to utilize our new Subscription license model. Subscription licensing ensures cost predictability, immediate access to current releases and improves license scalability providing the option to license AGi32 by the year or by the month.

Notable new features in AGi32 version 19 include AutoCAD 2018 DWG compatibility, import luminaire locations from an external file (CSV), render Google Earth® images and the ability to modify the reflectance and color of any texture image. This allows users to match textures (which make their visualizations look convincing), with actual project assumptions for surface reflectance and color. “This is a tremendous new feature for everyone who takes that extra step with AGi32 visualizations”, says David Speer, Lighting Analysts Director of Marketing.

Version 19 can also easily add your captured Google Earth® images to the textures library to be used in exterior renderings, but it goes a step beyond that. The software now automatically creates a scaled object and applies the texture image for you. You can edit the reflectance of that image to match site conditions.

AGi32 users have been asking for a free file viewer for years and it’s now available with AGi32 version 19. Anyone can download the Trial version of AGi32 from [www.lightinganalysts.com](http://www.lightinganalysts.com) (or [agi32.com](http://agi32.com)) and use the software in Inactive Mode. It will function as a file viewer with full navigation and printing capability.

A complete summary of AGi32 version 19 features can be found online at our Helpdesk at [support.agi32.com](http://support.agi32.com).

### **About Lighting Analysts, Inc.**

Founded in 1984, Lighting Analysts, Inc. [www.lightinganalysts.com](http://www.lightinganalysts.com)

Lighting Analysts, Inc. software systems are used by lighting industry professionals worldwide to aid in the conceptualization and design of lighting systems of almost any nature. Its **AGi32** lighting design and rendering software has won numerous industry accolades and awards.
