## IES Progress Report 2020

---

### **Lighting Analysts, Inc. ElumTools® Projected Calculation Points Feature**

*Littleton, Colorado, USA – November 19, 2020*

Lighting Analysts, Inc., a global leader in illumination engineering software, is pleased to announce a new feature in our software ElumTools®, “Projected Calculation Points” wins an IES 2020 Progress Report recognition!

ElumTools®, a calculation add – in for Autodesk Revit®, breaks new ground and improves workflows with *projected calculation points*. This feature enables accurate 3-D analysis of any exterior scene: sloped parking areas, topography, multi-level garages, stairs, ramps, and even elaborate architectural facades. The calculation boundaries can be constructed in Revit® or can be drawn by ElumTools® on the fly when using the command. Light meters can be aimed as needed to provide answers to previously difficult questions facing lighting designers.

Learn more about ElumTools® projected calculation points by watching a short video [HERE](#)

#### **About Lighting Analysts, Inc.**

Founded in 1984, Lighting Analysts, Inc. ( [www.lightinganalysts.com](http://www.lightinganalysts.com) ) is a world leader in lighting design software. Lighting Analysts, Inc. software systems are used by lighting industry professionals worldwide to aid in the conceptualization and design of lighting systems of almost any nature. Its AGi32® and ElumTools® programs have won numerous industry accolades and awards.
